# About Mutant Remix

Mutant Remix is a project that intends to combine the 'blobs' of Android's legacy emojis with the simple, cute designs of Mutant Standard.

Legacy Android

Mutant Standard

Mutant Remix

Mutant Remix aims to create a diverse, bold, and inclusive Unicode compliant emoji set (with some extra easter eggs) for anyone and everyone. The project is part of the overall Revolt chat platform which is one of the best privacy conscious ways to stay connected with your friends and community without sacrificing any usability.

# Strokes

In an effort to look good and effectively communicate the emoji's message on backgrounds of all shades outlines should be employed. These outlines should be black.

During emoji development different colours should be tried, as seen above. Outlines should only be black if they are located on the outermost edge or are needed for visual clarity. Strokes within the bounds of the emoji should be a variant of their fill colour.

# Contribution

Now you've read the specification are you interested in contributing? Here are some handy things that may help you get started:

- [The Coverage Table](#) - shows you what emojis need creating
- [Assets Repo](#) - contains all the emojis ready to edit

# Versions

This document will receive constant updates. To ensure you have the latest version go to <https://github.com/mutant-remix/specification>.
